

Contents

1. STRUCTURE AND FUNCTION OF SKIN	1
Structure of skin	1
Formation of skin	4
Skin as a barrier to moisture.....	5
Potentiation of skin damage by body fluids	9
2. CLASSIFICATION OF WOUNDS	13
Definition of a wound	13
Wound classification systems	14
3. WOUNDS: COUNTING THE COST.....	19
Introduction.....	19
Cost of treating 'chronic' wounds.....	19
Containing treatment costs.....	21
4. MECHANISMS OF WOUND HEALING	25
Introduction.....	25
Wound management techniques.....	25
Monitoring progress towards healing.....	30
Problems associated with wound healing.....	32
5. WOUND EXUDATE.....	39
Introduction.....	39
Properties of exudate.....	39
Exudate as a diagnostic aid	44
Exudate handling mechanisms	45
Management of exudate in clinical practice.....	54
6. THE DEVELOPMENT OF DRESSINGS	57
Introduction.....	57
Early wound dressings	58
Dressings and moist wound healing	64
The 'ideal' dressing.....	70
7. LABORATORY TESTING OF SURGICAL DRESSINGS.....	79
Introduction.....	79
Importance of laboratory testing	80
Standards for dressings	80
Fluid handling tests	81
Fluid affinity testing.....	94
Low-adherence.....	95
Conformability	97
Microbiological tests.....	98

Odour control	104
Biological tests	106
8. LOW-ADHERENT DRESSINGS	111
Impregnated fabric dressings	111
Alternative forms of low-adherent dressings	119
9. FILM DRESSINGS	139
Introduction	139
Examples of modern film dressings	144
Properties of film dressings	144
Experimental studies	151
Clinical experience with film dressings	154
10. FOAM DRESSINGS.....	181
Introduction	181
History of foam dressings	181
Classification of foam dressings	183
Key properties of foam dressings	198
Clinical experience with foam dressings	206
11. POLYSACCHARIDE FIBRE DRESSINGS	237
Introduction	237
Alginate dressings	237
Clinical experience with alginate dressings	247
Carboxymethylcellulose dressings	271
Hyaluronan	280
Chitin and chitosan	285
Bacterial cellulose	287
Oxidised cellulose	289
Current status of polysaccharide fibre dressings	289
12. HYDROCOLLOID DRESSINGS	301
Introduction	301
Development of hydrocolloid dressings	302
Physical properties	309
Experimental studies	313
Microbiological considerations	323
Clinical experience with hydrocolloid dressings	329
13. POLYSACCHARIDE BEADS	375
Introduction	375
Structure and mode of action	375
Effect upon wound healing	379
Clinical experience	381
14. HYDROGELS AND XEROGELS	393
Introduction	393
Properties of hydrogels	393

Hydrogel sheet dressings.....	398
Amorphous hydrogel dressings.....	412
Xerogels.....	422
15. HONEY AND SUGAR DRESSINGS	429
Introduction.....	429
Sugar as a wound dressing.....	429
Honey as a wound dresssing.....	434
16. SILVER DRESSINGS.....	473
Introduction.....	473
Properties of silver dressings.....	484
Toxicity of silver dressings.....	503
Clinical experience with silver dressings.....	509
Resistance to silver dressings.....	522
Conclusions.....	523
17. ODOUR CONTROLLING DRESSINGS.....	533
Introduction.....	533
Activated charcoal dressings.....	536
Clinical experience with charcoal dressings.....	542
18. SILICONE DRESSINGS FOR SCAR TREATMENT	547
Introduction.....	547
Commercial silicone dressings.....	549
Clinical experience with silicone dressings.....	549
19. MAGGOT THERAPY	563
Background to maggot therapy.....	563
History of maggot therapy.....	567
Basic biology of <i>Lucilia sericata</i>	573
Production and use of medical maggots.....	578
Method of application.....	580
Mechanism of action.....	586
Early accounts of the use of maggot therapy.....	595
Modern maggot therapy.....	596
Contraindications and side effects.....	607
Examples illustrating the use of maggots in clinical practice.....	611
Practical problems associated with maggot therapy.....	614
Maggots in veterinary practice.....	616
Myths and legends related to maggot therapy.....	617
20. NEGATIVE PRESSURE WOUND THERAPY	633
Historical background.....	633
Development of NPWT.....	634
Method of use.....	636
Clinical experience with NPWT.....	638
Cost implications of treatment.....	640
Comparisons between NWPT systems.....	641

mode of action	643
The future of NPWT	646
21. DRESSING SELECTION	651
Factors that impact upon dressing selection	651
Black necrotic wounds	652
Yellow sloughy wounds	657
Red granulating wounds	659
Pink epithelializing wounds.....	667
Malignant wounds	669
Infected wounds.....	670
22. BUYER'S GUIDE	675
List of products in alphabetical order	675
Manufacturers' contact details.....	681
23. INDEX.....	687
